A VISION OF CARE FOR OUR COMMUNITY

OUR HISTORY

We began in Fountain Valley as FHP Hospital and for ten years serviced only FHP members. In 1996, Memorial Health Services recognized the growth in our community and the need for better access to healthcare.

Memorial purchased FHP Hospital and we opened our doors to the entire community. We became Orange Coast Memorial Medical Center, the only not-for-profit hospital in our area.

OUR MISSION

As a not-for-profit hospital, all of our revenues after expenses are invested back into the hospital for new technology, equipment and other enhancements to patient care.

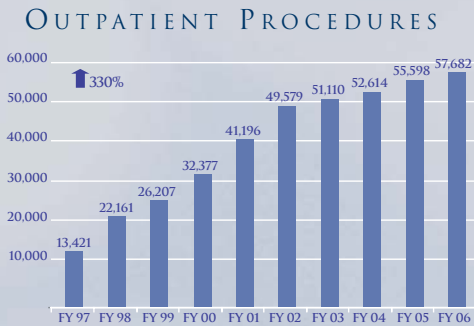

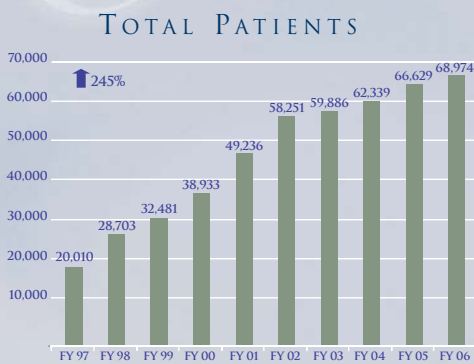

We have one mission... to provide the highest level of quality healthcare to the people we serve.

EXPANDING TO MEET COMMUNITY NEEDS

OUR GROWTH

Each day as we care for our patients, we see first-hand the vital need for healthcare services. Still, the actual numbers amaze us.

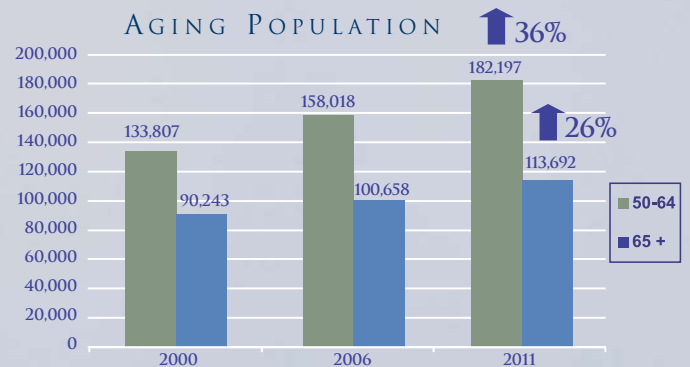

Since opening our doors, the number of patients coming to us for care has grown 245 percent. The highest area of growth has been in outpatient services, which has increased a staggering 330 percent. If that's where we are today, just think about the future.

OUR COMMUNITY

Our population is growing and aging. The number of people in our community between the age of 50 and 64 has increased dramatically since 2000, with 36 percent projected growth by 2011. This is the baby boomer generation on the cusp of becoming our senior citizens. The number of senior adults living in our community is expected to increase by 26 percent over the same time period. In the city of Fountain Valley alone, the increase is 39 percent. Our senior community is the most vulnerable to serious illness and represents the highest use of hospital services.

Our desire to continue offering the very best healthcare to our community is greater than the space we currently have to fulfill that desire. We must have significantly more space in order to meet the needs of those who count on us.

INTRODUCING THE ORANGE COAST PATIENT CARE PAVILION

Our expansion plans include development of the Orange Coast Patient Care Pavilion, a beautiful, modern facility that the residents of our community can be proud of. It will link to the existing hospital by two walkways and become the new front door to the hospital. The Pavilion will provide access to some of the most well-respected and experienced physicians in Orange County, as well as leading-edge diagnostic and treatment facilities.

The **MemorialCare Cancer Center at Orange Coast Memorial** will provide comprehensive services for the prevention and treatment of cancer under the medical leadership of renowned oncologists and other prestigious specialists. Services will include:

- No-cost prevention and screening programs open to the community.
- Advanced MRI, including Breast MRI, and CT scanning to identify disease as early as possible.
- Radiation therapy for cancer treatment.
- American Cancer Society Information Center open at-no-cost to the community.
- The MemorialCare Breast Center, led by a team of specialists who have dedicated their careers to the prevention, diagnosis and treatment of breast cancer.

The **Orange Coast Outpatient Surgery Center** will provide the very latest in surgical techniques for biopsy procedures, orthopedics, gastroenterology, ophthalmology, general surgery and other specialties. This center will attract some of the best surgeons in our community.

The Pavilion will also house **The Orange Coast Memorial Foundation**, providing philanthropic outreach programs to our community, like free senior transportation, cancer prevention programs and many enhancements to patient care.

The **MemorialCare Center for Obesity** will also be located in the Pavilion, providing solutions to the growing epidemic of child and adult obesity in our community.

WHAT ARE THE BENEFITS TO THE COMMUNITY?

By transitioning many of our outpatient services from the hospital to the Orange Coast Patient Care Pavilion, we will increase the number of patient beds in the hospital, provide our residents with improved access to advanced diagnostic, medical and surgical expertise and help secure our ability to serve our growing and aging community in the future.

The Orange Coast Patient Care Pavilion will also

- Improve access to modern, more affordable, healthcare services in one location
- Allow Orange Coast Memorial Hospital to retain and attract excellent physicians
- Generate revenue for the City of Fountain Valley through property taxes
- Create new jobs for the community
- Create new customers for area businesses

A VISION OF CARE FOR OUR COMMUNITY

Join Us in Providing Quality Healthcare For Our Families

Please consider me a supporter of the Patient Care Pavilion at Orange Coast Memorial Medical Center. Meeting the healthcare needs of our growing community with quality and innovative services is an effort that is worthy of support.
