

Congratulations!

Welcoming a new addition to the family is an exciting and joyous time, but it can also bring about questions and uncertainties. MemorialCare Medical Group is a strong advocate for vaccinating children and fully support the scientifically proven schedule of childhood immunizations recommended by the American Academy of Pediatrics (AAP). We're here to help guide you through this journey and answer commonly asked questions.

Immunization: frequently asked questions

Why is immunizing important?

Vaccinating children and adolescents may be the single most important health-promoting form of prevention we can perform as parents and caregivers. Vaccines are safe and effective at preventing serious illness and saving lives. Children who are not able to be vaccinated for medical reasons need their schoolmates and playmates to be immunized to help protect them against preventable diseases.

What diseases are prevented by vaccines?

- Diphtheria
- COVID
- Haemophilus influenzae type b
- Hepatitis A
- Hepatitis B
- Human papillomavirus (HPV)
- Influenza (flu)
- Measles
- Meningococcal infections
- Mumps
- Pertussis (whooping cough)
- Pneumococcal infections
- Polio
- Rotavirus
- Respiratory syncytial virus (RSV)
- Rubella (German measles)
- Tetanus
- Varicella (chickenpox)

When should I vaccinate my child?

24/7 virtual urgent care

In non-emergent medical situations, our physicians can treat your child's medical needs virtually through video in the comfort of your own home. To schedule an appointment, please scan the QR code or call our navigation center at **877-MYMEMCARE (696-3622)**.

24/7 eVisits

Complete an online health questionnaire so your child can be diagnosed and treated for common conditions (such as colds, sinus infections, flu and more) within one hour without an in-person or video visit. To start, scan the QR code or visit memorialcare.zipnosis.com.

Do you have a medical question? Our telephone advice nurses are available to help 24/7.

Whether your baby won't stop crying during the middle of the night or they're running a fever and you wonder if you need to seek medical attention, our telephone advice nurses are on standby to assist you. They will clarify your information, assess any symptoms, provide advice based on medical protocol and coordinate with your doctor to help determine the medical care needed.

To speak with a telephone advice nurse, call **877-MYMEMCARE (696-362)** and select the telephone advice nurse line option from the phone menu. In the event of a serious life-threatening emergency, call 911 immediately.
