

## COVID-19 Pfizer Vaccine Visit Type Changes and Decision Tree

The COVID-19 Pfizer booster vaccine is now approved for patients 12–15 years old. Patients 5-11 years old are now allowed to schedule 3<sup>rd</sup> doses if they are immunocompromised. A new Decision Tree (DT) will fire when scheduling 5-11 patients prompting schedulers to ask patients about their immunocompromised status.

### Visit Type Changes

- Visit type names now have the minimum age, brand, and dose specific in their titles. This will aid schedulers in hyperspace schedule the correct visit.

Specialty List	General List
12+ Y/O PFIZER BOOSTER [52248]	
12+ Y/O PFIZER COVID VACCINE [52251]	
12+ Y/O PFIZER FIRST DOSE [52245]	
12+ Y/O PFIZER SECOND DOSE [52227]	
12+ Y/O PFIZER THIRD DOSE [52237]	
18+ Y/O MODERNA BOOSTER [52249]	
18+ Y/O MODERNA COVID VACCINE [52242]	
18+ Y/O MODERNA FIRST DOSE [52244]	
18+ Y/O MODERNA SECOND DOSE [52226]	
18+ Y/O MODERNA THIRD DOSE [52236]	
5-11 Y/O PFIZER COVID VACCINE [52252]	
5-11 Y/O PFIZER FIRST DOSE [52246]	
5-11 Y/O PFIZER SECOND DOSE [52247]	
5-11 Y/O PFIZER THIRD DOSE [52265]	

- The new **5-11 Y/O PFIZER THIRD DOSE [52265]** visit type is allowed in those locations currently administering 5-11 vaccine. The Pfizer Booster visit type name is updated to designate patients 12+ can be scheduled.

### Decision Tree

- To identify if a patient is receiving a 3<sup>rd</sup> dose of Pfizer because they're immunocompromised based on criteria by CDC, a Decision Tree will fire if the scheduler selects any of the **5-11 Y/O Pfizer Third Dose [52265]** visit type.
