

OBSERVER ROLE: **PFIZER**

The Pfizer COVID-19 Vaccine is an intramuscular injection administered as a series of two doses (0.3 mL each) 3 weeks apart.

CONTRAINDICATION

- *Do not administer the PFIZER COVID-19 Vaccine to individuals with a known history of a severe allergic reaction (e.g., anaphylaxis).*

OBSERVATION:

Postvaccination Observation Times for Persons without Contraindications to COVID-19 Vaccination

- 30 minutes: Persons with a history of an immediate allergic reaction of any severity to a vaccine or injectable therapy or a history of anaphylaxis due to any cause
- 15 minutes: All other persons

Observe for any immediate allergic reactions defined as any hypersensitivity-related signs or symptoms, such as urticaria, hives, angioedema, respiratory distress (e.g., wheezing, stridor), or anaphylaxis. If any symptoms are observed, activate plan to contact emergency medical services immediately

I have reviewed the just in time training procedure listed above
